UPCOMING AIR, WASTE, & WATER-RELATED HEARINGS, MEETINGS, & EVENTS

PUBLIC HEARING-The Department of Natural Resources and Environmental Control (DNREC), Division of Air Quality (DAQ), will conduct a public hearing on a proposed state implementation plan (SIP) revision, entitled "Delaware Reasonably Available Control Technology (RACT) State Implementation Plan (SIP) under the 2008 Ozone National Ambient Air Quality Standard (NAAQS)." According to Section 182(b)(2) of CAA, Delaware is required to submit to EPA in July 2014 a SIP revision to demonstrate that Delaware has implemented necessary RACT control measures for stationary emission sources of volatile organic compounds (VOC) and oxides of nitrogen (NOx) in Delaware for implementation, maintenance, and enforcement of the 2008 ozone NAAQS. In the subject document, DAQ (1) reviews and analyzes Delaware's SIP-related RACT regulations, (2) establishes RACT NOx emission limits for two units at Delaware City refinery, and (3) determines that the ozone RACT control measures meet the CAA's RACT requirements for the 50 ton-per-year (TPY) major VOC sources and for the 100 TPY major NOx sources, and (4) demonstrates that Delaware's ozone RACT regulations represent the current RACT levels under the 2008 ozone NAAQS. The public hearing will be held on **June 2** beginning at 6:00 p.m. in the DNREC Auditorium, 89 Kings Highway, Dover, DE 19901. The document was published in the May 1 issue of Delaware Register of Regulations, and can be viewed now at <http://regulations.delaware.gov/register/may2014/>, in General Notice section. NOTICE OF PUBLIC HEARING TITLE V SYNTHETIC MINOR PERMIT APPLICATION-Notice is hereby given that Diamond Materials LLC has submitted an application pursuant to 7 DE Admin. Code 1102, Section 2.1, 11.2.9, and 12.3 to relocate an existing crusher from 924 South Heald Street to 200 Marsh Lane, New Castle, DE. Diamond Materials requests a limit of 708 hours of operation per year. This limit is necessary to restrict Diamond Materials potential to emit air pollutants, and the limit will be enforceable by the EPA and the state. Total estimated emissions from the facility are 4.85 TPY of NOX, 0.17 TPY of CO, 0.05 TPY of THC's, 0.36 TPY of PM10, and 0.004 TPY of SO2. The Department of Natural Resources and Environmental Control, Division of Air Quality, will conduct a public hearing on the application and the draft permit Permit: APC-2014/0060. The public hearing will be held at 6 pm on **June 3** at the DNREC office located at 391 Lukens Drive, New Castle, Pat Ellis/Conf. Room B. The application, the "draft" permit, Permit: APC-2014/0060, all materials that the applicant has submitted (other than those granted confidential treatment under DNREC rules), and a copy of summary of other materials, if any, considered in preparing the "draft" permit may be inspected at the offices of the Division of Air Quality, 655 S. Bay Road, Suite 5N, Dover, or 715 Grantham Lane, New Castle. To submit comments, for additional information or for an appointment to inspect the application and draft

permit, please contact Tammy Henry, in the Grantham Lane Office at (302) 323-4542. Statements and testimony may be presented orally or in written form before the hearing. It is requested that those interested in presenting statements register in advance by mail. Written statements may be presented prior to the hearing and should be addressed to:

Title V Permit Modification Applications -Notice is hereby given that the Delaware Solid Waste Authority (DSWA) having a facility at 28560 Landfill Lane, Georgetown, Delaware, has submitted a request for a significant permit modification pursuant to 7 DE Admin. Code 1130, Section 7 for operating permit: AQM-005/00099(R-2) Revision 1. Based on the data and certifications contained in the application, the Division of Air Quality concludes that the applicant meets all applicable requirements promulgated by the Environmental Protection Agency (EPA) and the Department of Natural Resources and Environmental Control (DNREC). Therefore a "draft/proposed" significant permit modification has been prepared. This "draft/proposed" significant permit modification will modify the existing visible emission monitoring requirements for the passive flares in use at the DSWA Southern Solid Waste Management Center (SSWMC) in Georgetown. Visible emission observations of the passive flares will only be required during normal business hours (Monday through Friday, from 0700 hours until 1500 hours, excluding holidays and weather-related closings). The "draft/proposed" significant permit modification is being submitted to EPA for concurrent processing. If there are no significant comments, the "draft/proposed" significant permit modification will be issued as a final permit after expiration of the EPA review period. A public hearing concerning the permitting action will not be held unless the Secretary of the Department of Natural Resources and Environmental Control receives a request for such hearing within thirty (30) days from the date of this notice, ending **June 10**. To submit comments, for additional information or for an appointment to inspect the application, please contact Nicole Hill at the Dover Office at 7399402; or visit:

Title V Modification Applications -The Department of Natural Resources and Environmental Control, Division of Air Quality, received an application from Delaware Municipal Electric Corporation for a Minor Permit Modification to Permit: AQM-001/00152-Renewal 2-Revision 1 in accordance with the procedures of 7 DE Admin. Code 1130. The Minor Permit Modification consists of a revision of the permit language for the pre-combustion air chiller. Based on the data and certifications contained in the application, the Division of Air Quality concludes that the applicant meets all applicable requirements promulgated by the Environmental Protection Agency (EPA) and the Department of Natural Resources and Environmental Control (DNREC). The "draft/proposed" permit renewal is being submitted to EPA for concurrent processing. If there are no significant comments, the "draft/proposed" permit renewal will be issued as a final permit after expiration of the EPA review period. A public hearing concerning the permitting action will not be held unless the Secretary of the Department of Natural Resources and Environmental Control receives a request for such hearing within thirty (30) days from the date of this notice, ending **June 10**. To submit comments, for additional information or for an appointment to inspect the application, please contact Nicole Hill at the Dover Office at (302) 739-9402; or visit:

Federally Enforceable 7 DE Admin. Code 1102 Applications-Notice is hereby given that Delaware City Refining Company LLC (DCRC) requests a construction permit to install a Selective Catalytic Reduction System (SCR) on each of two combined cycle units (CCUs) at the Delaware City Power Plant (DCPP) at the Delaware City Refinery located at 4550 Wrangle Hill

Road, DE City, DE 19706. The SCR system has been identified as a NOx control strategy to effectively reduce CCU NOx emissions by 80 %. The application indicates the total expected reduction in potential NOx emissions will be 534 TPY. DCRC is required to implement these NOx reductions by the end of 2015 for it to comply with the facility's declining NOx cap limit of 1,650 TPY. The "draft" construction permit is being submitted to EPA for review. If there are no significant comments, the "draft" construction permit will be issued as a final permit after the expiration of the EPA review period. A public hearing on the above application will NOT be held unless the Secretary of DNREC receives a request for a hearing regarding that application within 30 days from the date of this notice, ending **June 18**. To submit comments, for additional information or for an appointment to inspect the application and "draft" permit, please contact Nicole Hill at the Dover Office at 739-9402; or visit:

SITE INVESTIGATION AND RESTORATION SECTION – The Division's Site Investigation and Restoration Section (SIRS) is responsible for the identification, evaluation and remediation of sites in Delaware that have had past releases of hazardous substances. The Section manages the contaminated sites under three major programs in accordance with the Hazardous Substance Cleanup Act (HSCA). The three programs are the Brownfields Development Program, the Voluntary Cleanup Program (VCP) and the HSCA Enforcement Program (for sites requiring enforcement action).

The Brownfields Development Program encourages the cleanup and redevelopment of vacant, abandoned or underutilized properties, which may be contaminated. A party seeking to develop such a property negotiates with SIRS for a Brownfields Development Agreement (BDA) to perform an investigation and, if necessary, a remedial action or remedy, for the purpose of addressing the risks posed by past releases of hazardous substances at these sites. However, a BDA is only available to parties that are not current site owners. The Voluntary Cleanup Program (VCP) Agreement is available to site owners, who want to clean up their sites and are already liable as a potentially responsible party for the site. Proposed and final plans of remedial action are available online at: <http://www.dnrec.delaware.gov/whs/awm/SIRB/Pages/SIRBPlans.aspx> under "Announcements." For site-specific information, please see DNREC's Environmental Navigator at <http://www.nav.dnrec.delaware.gov/DEN3>

NOTIFICATION OF NEGOTIATIONS FOR A BROWNFIELDS DEVELOPMENT AGREEMENT FOR THE 3022-3028 NEW CASTLE AVENUE SITE (DE-1577)

Pursuant to the Hazardous Substance Cleanup Act (HSCA), 7 Del. C. Chapter 91, §9126, the Department of Natural Resources and Environmental Control (DNREC) is required to issue a public notice within twenty days after entering into negotiations for a Brownfields Development Agreement (BDA). DNREC's Site Investigation and Restoration Section is negotiating a BDA with New Castle County regarding the 3022-3028 New Castle Avenue Site (Site), located at 3022-3028 New Castle Avenue in New Castle. Identified by New Castle County as tax parcel numbers 10-010.00-018, 10-010.00-017 and 10-010.20-534, the 12.89 acre Site may have had a release of hazardous substances as a result of past use as a car sales/repair business and material storage facility. This notification will expire on **May 20**. For more information, please contact Project Manager, Kate Durant at (302) 395-2600; or visit:

NOTIFICATION OF NEGOTIATIONS CONCERNING A VOLUNTARY CLEANUP PROGRAM AGREEMENT FOR THE OYSTER HOUSE VILLAGE SITE (DE-1573)

Pursuant to the June 2000 amendment to the Hazardous Substance Cleanup Act (HSCA), 7 Del. C. § 9107 (a)(1), the Department of Natural Resources and Environmental Control (DNREC) is required to issue a public notice announcing the onset of negotiations concerning Voluntary Cleanup Program (VCP)

Agreements, as well as any voluntary settlement agreements requiring a remedy, between DNREC and potentially responsible parties. The amendment states that DNREC must provide "public notification within 20 days after entering into negotiations for a voluntary cleanup settlement agreement with any person that agrees to perform a remedy." The Site Investigation and Restoration Section (SIRS), on behalf of DNREC, initiated the VCP in February 1995 in an effort to lessen the time and cost required in cleaning up contaminated sites by reducing litigation. VCP Agreements are available, upon application to DNREC, to potentially responsible parties or prospective purchasers who may be liable for the contamination of a property, but who wish to settle their liabilities with DNREC under HSCA. DNREC is negotiating a VCP Agreement with Sunrise Ventures, LLC regarding the Oyster House Village Site located at Oyster House Road in Rehoboth, Delaware. Sussex County identifies the approximately 4.3 acre Site as tax parcel numbers 3-34-19.08-42.00, -42.01, -44.00, and 3-34-19.12.4.00 and -4.01. This notification will expire on **May 20**. NOTIFICATION OF NEGOTIATIONS CONCERNING A VOLUNTARY CLEANUP PROGRAM AGREEMENT FOR THE 101 SOUTH DUPONT HIGHWAY-NEW CASTLE SITE (DE-1581)

Pursuant to the June 2000 amendment to the Hazardous Substance Cleanup Act (HSCA), 7 Del. C. § 9107 (a)(1), the Department of Natural Resources and Environmental Control (DNREC) is required to issue a public notice announcing the onset of negotiations concerning Voluntary Cleanup Program (VCP) Agreements, as well as any voluntary settlement agreements requiring a remedy, between DNREC and potentially responsible parties. The amendment states that DNREC must provide "public notification within 20 days after entering into negotiations for a voluntary cleanup settlement agreement with any person that agrees to perform a remedy." The Site Investigation and Restoration Section (SIRS), on behalf of DNREC, initiated the VCP in February 1995 in an effort to lessen the time and cost required in cleaning up contaminated sites by reducing litigation. VCP Agreements are available, upon application to DNREC, to potentially responsible parties or prospective purchasers who may be liable for the contamination of a property, but who wish to settle their liabilities with DNREC under HSCA. DNREC is negotiating a VCP Agreement with McDonald's USA, LLC regarding the 101 South DuPont Highway New Castle Site, located at 101 South DuPont Highway in New Castle. New Castle County identifies the approximately 1.39 acre Site as tax parcel number 10-024.00-034. This notification expires on **May 30**. LEGAL NOTICE PUBLIC HEARING REGARDING THE A-1 AUTO PARTS SITE (DE-1172)-

Pursuant to 7 Del. C. §9109(a)(3) of the Hazardous Substance Cleanup Act (HSCA), the Department of Natural Resources and Environmental Control (DNREC)-Site Investigation and Restoration Section (SIRS) has rescheduled a public hearing for Wednesday, **June 25** beginning at 10:00 a.m. in the Pat Ellis Conference Room at the offices of DNREC-SIRS, 391 Lukens Drive, New Castle, Delaware 19720. The hearing will address the A-1 Auto Parts Site (Site) located at 410 Garasches Lane in Wilmington. DNREC advertised that the public hearing would be held on May 7, but was recently contacted by the Site owner's counsel to negotiate a Consent Decree to address the performance and payment for a Remedial Investigation/Feasibility Study (RI/FS) to be performed at the Site without the need for an enforcement action. Thus, DNREC agreed to postpone the public hearing to allow enough time to negotiate a Consent Decree. Nevertheless, DNREC will continue to proceed through an enforcement action at a public hearing on **June 25** unless the Consent Decree is signed, pursuant to §9109(a)(3) of HSCA, to require a remediation of the Site. For more Site-specific information please contact the project manager, Karissa Hendershot or Qazi Salahuddin at (302) 395-2600; or visit:

Agricultural Utilization Permit – Request for Permit Renewal - Mountaire Farms of Delaware, Inc.:

Mountaire Farms of Delaware, Inc. has requested renewal of their existing agricultural utilization permit, State Permit Number AGU 0803-S-03. The current permit authorizes the application of stabilized biosolids generated at Mountaire's Millsboro Poultry Processing Wastewater Treatment Facility onto approximately 120 acres of forested land known as the Frame Farm within an approximately 272 acre parcel, located northeast of Millsboro, Delaware. The biosolids are required to undergo periodic analysis for a list of specific parameters including nutrient content and metals. The biosolids will be delivered to the site in accordance with Delaware Waste Transporters Permit No. OH-091 where it will be land applied at agronomic rates.

Agricultural Utilization Permit - Request for Permit Renewal - Mountaire Farms of Delaware, Inc.:

Mountaire Farms of Delaware, Inc. has requested renewal of their existing agricultural utilization permit, State Permit Number AGU 0802-S-03. The existing permit authorizes the application of stabilized biosolids generated at Mountaire's Millsboro Poultry Processing Wastewater Treatment Facility and Dissolved Air Flotation (DAF) solids generated at Mountaire's Selbyville Poultry Processing Wastewater Treatment Facility, onto four farms known as the Al Rust Farm, Thorogood Farm, Frame Farm, and the Cordrey Farm. The four farms comprise approximately

300 acres of land suitable for land application and are located northeast of Millsboro, Delaware. The biosolids are required to undergo periodic analysis for a list of specific parameters including nutrient content and metals. The biosolids and/or DAF will be delivered to the sites in accordance with Delaware Waste Transporters Permit No. OH-091 where it will be land applied at agronomic rates.

Agricultural Utilization Permit - Request for Permit Renewal - Kent County (Delaware) Levy Court:

Kent County Levy Court has requested renewal of their existing agricultural utilization permit, State Permit Number AGU 0901-K-03. The current permit authorizes the application of treated biosolids generated at the Kent County Regional Wastewater Treatment Facility onto four farms known as the Kent County Sludge Farm, the Nyle Calloway Farm, the Blessing Farm, and the Goldinger Farm, comprising a total of approximately 365 acres of farmland in Kent County, Delaware that is suitable for land application. The biosolids are required to undergo periodic analysis for a list of specific parameters including nutrient content and metals. The biosolids will be delivered to the land application sites in accordance with Delaware Waste Transporters Permit No. OH-11 where it will be land applied at agronomic rates.

The above referenced permits will be renewed under Part III, B. of the Department's Guidance and Regulations Governing the Land Treatment of Wastes which allows for such activity pending public notice.

Distribution and Marketing Permit - Request for Renewal - Kent County (Delaware) Levy Court:

The existing permit authorizes the application of lime stabilized, heat pasteurized biosolids and heat dried biosolids generated at the Kent County Regional Wastewater Treatment Facility onto farmland, either owned by the county or onto private land, as a fertilizer and liming agent. To assure compliance with State and Federal regulatory requirements, including requirements for "Class A" "Exceptional Quality" biosolids product, finished biosolids product is sampled for specific bacterial, chemical and nutrient parameters. Land application of biosolids, in accordance with State Permit Number DM 0902-K-03, may be made onto lands to meet Calcium Carbonate Equivalency (CCE) and pH requirements as indicated by an approved soil test.

The County requests that the existing permit, for the production of their biosolids product known as "Kentorganite", be renewed.

"Class A" "Exceptional Quality" biosolids product produced will be sold as "Kentorganite" for use as a fertilizer and liming material in agricultural settings on crops that will not be utilized for human consumption and for use on athletic fields, golf courses, roadside grass strips and other similar grassy areas.

The above referenced permit will be renewed under Part III, B. of the Department's Guidance and Regulations Governing the Land Treatment of Wastes which allows for such activity pending public notice.
